### April 2011 Airline System Traffic Up 1.4 Percent from April 2010

The U.S. Department of Transportation's Bureau of Transportation Statistics (BTS) today reported in a release of preliminary data that U.S. airlines carried 60.5 million scheduled domestic and international passengers in April 2011. This is a 1.4 percent increase from April 2010 (Table 1). The April 2011 passenger total was also 1.7 percent above that of two years ago in April 2009 but remained 4.3 percent below the early recession level of April 2008 (Table 2).

BTS, a part of DOT's Research and Innovative Technology Administration, also reported that U.S. airlines carried 0.6 percent more domestic passengers in April 2011 than in April 2010. The number of international passengers on U.S. carriers in April 2011 increased 7.1 percent over April 2010 (Tables 7, 13).

#### Passenger Load Factor on All U.S. Scheduled Airlines (Domestic & International), May 2009-Apr 2011

## **AIRLINE TRAFFIC PRESS RELEASE**

### **ADD ONE**

Additional traffic numbers can be found on the [BTS website](#) in the Airline Industry box. Click on a link in the column on the right. For more historic numbers, see [Traffic](#) on the BTS website.

### **Passengers**

**Systemwide:** US airline systemwide passenger numbers began turning upward in early 2010 after declines that began in April 2008 and continued for two years. There were 2.1 percent fewer passengers in the April 2009 to April 2010 period compared to April 2008 to April 2009. From the year ending April 2010 to the year ending in April 2011, systemwide passenger numbers on US airlines increased 2.9 percent. See Table 2 and previous [Airline Traffic Press Releases](#).

**Domestic:** U.S. airline domestic passenger numbers showed the same pattern as the systemwide numbers but have recovered more slowly. There were 1.9 percent fewer passengers in the April 2009 to April 2010 period compared to April 2008 to April 2009. From the year ending in April 2010 to the year ending in April 2011, domestic passenger numbers on U.S. airlines increased 2.3 percent. See Table 8 and previous [Airline Traffic Press Releases](#).

**International:** The decline in the number of international passengers on U.S. airlines did not start until September 2008, five months after the domestic drop-off began. However, the international decline was more severe, with a 3.3 percent decline in the number of passengers in the April 2009 to April 2010 period compared to April 2008 to April 2009. The recovery has been faster. From the year ending in April 2010 to the year ending in April 2011, international passenger numbers on U.S. airlines increased 6.9 percent. See Table 14 and previous [Airline Traffic Press Releases](#).

### **Load Factor**

In February 2011, U.S. airline systemwide load factor failed to attain record high levels for the first time in 19 consecutive months. Systemwide load factors, the combination of domestic and international, set all-time records for each month beginning with July 2009 as airlines reduced capacity. Beginning in early 2010, as passenger numbers increased, all-time high load factors resulted. In the latter half of 2010, airlines began adding new capacity, leading to less growth in load factors and, in April 2011, a reduction from the previous year. International capacity, measured by available seat-miles, grew 12.3 percent from April 2010 to April 2011 while overall system capacity grew 5.4 percent. The increased capacity resulted in reduced systemwide, domestic and international load factors in April 2011 compared to April 2010.

### **Top Airlines in April**

In April, Delta Air Lines carried more total system passengers than any other U.S. airline (Table 4) and Southwest Airlines carried the most domestic passengers (Table 10). American Airlines carried the most international passengers (Table 16).

- more -

**AIRLINE TRAFFIC PRESS RELEASE  
ADD TWO**

During the first four months of 2011, Southwest carried more total system and domestic passengers than any other U.S. airline (Tables 3, 9). American carried the most international passengers (Table 15).

**Top Airports in April**

In April, more total system and domestic passengers boarded planes at Atlanta Hartsfield-Jackson International than at any other U.S. airport (Tables 6 and 12); and more international passengers boarded U.S. carriers at Miami International than at any other U.S. airport (Table 18).

During the first four months of 2011, more total system and domestic passengers boarded planes at Atlanta Hartsfield-Jackson than at any other U.S. airport (Tables 5 and 11); and more international passengers boarded U.S. carriers at Miami than at any other U.S. airport (Table 17).

For other comparisons from the first four months of 2010 to the first four months of 2011 and from April 2010 to April 2011, see the following tables:

**Reporting Notes**

Data are compiled from monthly reports filed with BTS by commercial U.S. air carriers detailing operations, passenger traffic and freight traffic. This release includes data received by BTS from 80 carriers as of July 5 for U.S. carrier **scheduled** civilian operations. Go to <http://www.transtats.bts.gov/releaseinfo.asp> for the complete list of reporting and non-reporting carriers. U.S. carriers' foreign point-to-point flights are included in system and international totals. To create a customized table for passengers, flights, RPMs, ASMs and other data, including non-scheduled service, go to [http://www.bts.gov/programs/airline\\_information/air\\_carrier\\_traffic\\_statistics/](http://www.bts.gov/programs/airline_information/air_carrier_traffic_statistics/).

Traffic numbers are available on the BTS website at TranStats, the Intermodal Transportation Database, at <http://transtats.bts.gov>. Click on "Aviation." For system passengers, RPMs and ASMs by carrier through April, click on "Air Carrier Summary Data (Form 41 and 298C Summary Data)," and then click on "Schedule T-1." Use crosstabs to find scheduled service.

For domestic numbers through April and international numbers through January by origin as well as by carrier, after clicking on "Aviation," click on "Air Carrier Statistics (Form 41 Traffic)." Click on "T-100 Market" for system passenger numbers, "T-100 Domestic Market" for domestic or "T-100 International Market" for international. For flights, stage length and trip length, use the appropriate T-100 Segment database. Use crosstabs to find scheduled service.

TranStats system and international totals do not include U.S. carriers' foreign point-to-point flights. For April, U.S. carriers reported 177,257 foreign point-to-point passengers. For January through April, U.S. carriers reported 817,514 foreign point-to-point passengers.

Data are subject to revision. BTS has scheduled Aug. 11 for the release of May traffic data.
